

E2M and MVP Series vacuum pump
For pre-evacuation circuits carousels

E2M series vacuum pumps

The E2M series is the international reference point for both performance and long term reliability for vacuum pumps in the industrial installations. E2M pumps can be equipped, according to the application needs, with a very large set of accessories and are available in broad range of capacities: 18, 28, 40, 80, 175 and 275 @ 50 Hz.

In cases where very high pumping speeds are required, E2M pumps can suitably be coupled to Roots mechanical booster pumps. Other pump models are available on request.

MVP series vacuum pumps

MP vacuum pumps are top quality and last generation pumps, very easy to use, very quiet during operation and intuitive in maintenance. All controls are clearly marked and have large finger grips for ease of use. The sight glass is clearly visible and both inlet and outlet are fitted with standard NW 25 flanges for easy connection to accessories.

Large diameter oil passages allow for easy maintenance and any filling spillage is contained by the oil box well. No special tools are needed for servicing. The high reliability and top performance of this innovative line of pumps are highly regarded in the refrigeration and A/C applications.

- Company Profile
- Vacuum and Charging units
- HC Refrigerants handling systems
- Special Units
- Vacuum and Charging Injectors
- Refrigerant transfer pump
- Pressure test units leak detectors
- Preliminary evacuation
- Electrical and functional test
- Ultrasonic tube sealers
- IPCS & IPCS PLUS
